**Significant judgements and estimates**

The Directors have made judgements, estimates and assumptions that affect the amounts reported within the financial statements during the year. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The Directors' estimates, assumptions and judgements that have a significant risk of causing material adjustment to the carrying amount of assets and liabilities within the financial statements are addressed and detail is provided in the associated notes.

2. **ACCOUNTING POLICIES - continued**

**Financial instruments**

The company has no complex financial statements but does hold basic financial instruments of cash at bank, debtors and creditors.

Cash and cash equivalents comprise cash at bank and on hand, foreign currency on hand, demand deposits with banks and other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. A bank overdraft would be shown within current liabilities.

Trade and other debtors are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less losses for bad debts except where the effect or discounting would be immaterial. In such cases, trade and other debtors are stated at cost less losses for bad debts.

Trade and other creditors are initially recognised at fair value and subsequently measured at amortised cost using the effective interest rate unless the effect of discounting would be immaterial. In such cases, trade and other creditors are stated at cost.

**Taxation**

Taxation for the year comprises current and deferred tax. Tax is recognised in the Profit & Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

**Deferred tax**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

**Pension costs and other post-retirement benefits**

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

**Employment benefits**

The total cost of employee benefits to which employees have become entitled as a result of service rendered to the entity during the reporting period are recognised and charged to the profit and loss account in the period to which they relate.

**Provision for liabilities**

A provision for liabilities is initially recognised when there is an obligation at the balance sheet date as the result of a past event, it is probable that there will be the transfer of funds in settlement and the amount of the obligation can be estimated readily. The provision is subsequently measured by placing a charge against the provision only for expenditure for which the provision was originally recognised.
